Opendock

POWERED BY LOADSMART

Transform Your Dock Scheduling with Opendock.

Opendock is a simple and powerful cloud-based dock scheduling software for warehouses who want to improve dock performance. By connecting shippers, carriers, brokers to the same online scheduling platform, warehouses can reduce detention fees, labor costs, and time spent on phone calls and emails.

Take control of your dock appointments

Dock scheduling and appointment management is a key component to on-time performance, warehouse labor management, and truck wait times. Relying on first-come, first-serve, phone calls, emails and spreadsheets can lead to delays that drive up costs and impact customer experience.

With an online scheduling platform, warehouses have a centralized location for dock appointments to be viewed and managed in real-time.

Streamline dock scheduling

Get back the time your staff spends managing appointments with phone calls and email. Opendock gives facilities a shared dock schedule that can be used by planners, carriers, and brokers to book appointments online.

No more surprise arrivals

Align your dock schedule, warehouse labor, and truck arrivals. With Opendock, trucks arrive when they're expected allowing you to minimize truck wait time, keep detention fees low, and save on labor expenses.
